6. **Nature of contract**
Fee-based
7. **Contract description**
Following the launch in 2004 of the Lake Victoria Water and Sanitation (LVWATSAN) Initiative by the governments of Kenya, Tanzania and Uganda with the aim to protect the environment of Lake Victoria and the wellbeing of the population in the Lake Basin, the EIB launched a Project Formulation Study (PFS) in 2010 with the overall objective to scale up the LVWATSAN Initiative and to identify current donor interventions, assess future requirements, to evaluate the need for improved WATSAN provision, drainage and solid waste facilities, and to recommend an appropriate set of measures in each location to address the sectors' needs for a 10-year-medium term period. This study will now be the most important source of information for the subject TA-operation and the related investments.
The objective of the present TA operation is to ensure that the Promoter is equipped with both the skills and operational tools to be able to sustainably manage the additional infrastructure that is being built under this project, and to gain the capacity to extend on these interventions to keep up with the increasing demands of a growing city. The TA will enable the Promoter to achieve the maximum benefit from the investments currently being implemented under the LVWATSAN programme, as well as future investments planned to accommodate the significant anticipated increase in population to 2040. The following aspects should be addressed: Business Planning, Financial Management, Financial Systems, Billing Systems, Asset Management and GIS Systems, Sanitation Operations, Accelerated Connections and Industrial Compliance.
The core team will be composed of a Team Leader/Project Manager, a Deputy Team Leader/Business Planning Specialist, a Senior Finance Specialist and a Sanitation Expert/WASH Engineer. In addition to the specific qualifications and skills required for each role, all experts should be fluent in English and preferably have experience of Africa or other similar developing regions. The core team will be supported by non-key experts,

whose profiles would be the following: Senior ICT/Software Expert, GIS Consultant, Community Engagement Expert and other Non-Key Experts, as required.

8. **Indicative budget**

EUR 1,000,000
